Re: B-Street Lift Station (La Brucherie LS) Improvements

Dear Mr. Loper:

As you are aware, the scope of work for the abovementioned project has changed significantly from Webb's original scope of services, which was to install a screen within the existing wet well to eliminate the solids from the wet well. The design for the Project has been completed and construction will begin shortly on the project. Webb previously requested, and received a budget amendment for the additional design, however that request did not include the additional inspection effort necessary to cover the expanded scope of work for this project. The original inspection budget included enough time to have the screens installed, however the proposed construction has a duration of 175 (one hundred and seventy five) calendar days and will require the installation of a lift station, piping modifications, demolition of the existing lift station, construction of a canopy and site work. Please note that this request does not include costs related to SCADA integration for the lift station, however that work can be provided if requested by the City.

As a result, Webb is requesting additional construction management and inspection budget for this project. Below is a summary of the additional work:

Additional Construction Management - (Webb and SKM for Submittal Review, etc.)	\$9,500
Additional Inspection Effort (Holt Group)	\$51,300

As discussed above, Webb is requesting an additional authorization to the budget for this project in the amount of \$60,800 for additional construction management and inspection effort. Please feel free to contact me with any questions regarding this request.

Sincerely,

ALBERT A. WEBB ASSOCIATES

Shane Bloomfield, P.E.
Project Manager
