**IMPERIAL CITY COUNCIL
 AGENDA ITEM**

SUBJECT: Construction Work Hours	DISCUSSION/ACTION: 1. Discuss, Approve/Disapprove construction work hour change for WM Lyles for MBR WW Plant.
DEPARTMENT INVOLVED:	
BACKGROUND/SUMMARY:	
For the months of April to August, W.M. Lyles Co. requests to start as early as 1:30 AM on concrete pour days and 3:30 AM on days with no scheduled pours. Request is based on the safety field craft due to ambient temperatures in summer months to avoid heat illness and exposure. Currently the working hours are 7:00 AM to 5:00 PM Mon-Fri. Please see attached letter from W.M. Lyles Co.

Project: City of Imperial WWTP Upgrades Project

Subject: Early Start Construction Work Hours

Dear Mr. Loper,

Technical Specification Section 011000-1.12B of the City of Imperial Wastewater Treatment Plant Upgrades Project states the normal working hours of 7:00 a.m. to 5:00 p.m., Monday through Friday. W. M. Lyles Co. requests to start all General Construction Activities earlier than currently permitted by the Specification Section.

For the months of April to August, W. M. Lyles Co. requests to start as early as 1:30am on concrete pour days and 3:30am on days with no scheduled pours. Pour days shall be shown on the three week look ahead schedule.

The requested start times are based on the safety of W. M. Lyles Co. field craft. Ambient temperatures during the summer months in the City of Imperial exceed over 100° F. To limit the exposure of our field craft to high ambient heat and potential heat illnesses, work shifts should be adjusted to avoid work during the hottest part of the day.

The requested start times are also based upon the design requirements, which limit the temperature of the concrete at the time of placement to no more than 90° Fahrenheit. Maintaining concrete temperatures below 90° Fahrenheit in the concrete trucks while being transported from the batch plant to the site becomes more challenging with higher ambient temperatures. Allowing early morning starts and using temperature mitigation methods as necessary, will reduce the temperature of the placed concrete and provide a better finished product.

Please review and respond at your earliest convenience. If you have any questions or require further information, please feel free to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Ivette Ayon".
